

Mr. Gaurav Lochan

Staff Engineer

VMWare

Gaurav Lochan is a Staff Engineers at VMware Bangalore's India Development Center and works as an architect in the cloud computing group.

He's designed and implemented parts of the Lab Manager product over various releases, since its inception in 2005 at Akimbi Systems (acquired by VMware in 2006). He has helped define and implement the scalability architecture for the upcoming VMware Cloud Director product.

Prior to Akimbi Systems, he worked at Microsoft, on 802.11 and Bluetooth technologies for Windows XP, and then on glitch free multimedia support for Vista.

He is co-author of 2 patents; 'Bluetooth PAN driver' and 'Media processing on Multicore systems'; and has one patent applied for "Virtual Networking in a Server Farm"
